

# BLUERUNNER SOLUTIONS

## CASHLESS SOLUTION

**A cloud and tablet based cashless POS system that allows multiple student recognition methods to allow for operator ease of use, driving a quick service and uptake of school meals.**

Many schools are looking at new ways of improving efficiencies, trying to reduce waste and drive uptake and engagement by utilising a Cashless POS system. BlueRunner acts as a partner, supporting and advising throughout the implementation and after care to ensure continued success.

## WHAT THIS MEANS FOR YOU >>

Introducing the cashless POS system provides you with the tools you need to encourage a speedy service whilst helping to safeguard against allergens and accurately record spending for students. Other features include:

- Manage different menus per service types and student types
- Utilise different student recognition methods, i.e., RFID, Biometric, QR codes, facial recognition, pin codes and name look up
- Manage multiple wallets for students
- Immediate payment to automate debt management
- Full reporting suite to review transactions and view analytics and trends
- Pre-ordering and native app modules

# BLUERUNNER SOLUTIONS

## MEAL ATTENDANCE

Process service for multiple service types i.e. Lunch, Tuck Shop, After School Club etc. in an intuitive UI that helps deliver a more efficient service

## RECOGNITION METHODS

Integrate with biometric solutions or schools internal card ID systems for student recognition. i.e. Fingerprint or facial recognition

## APP RECOGNITION

Operate a standalone solution with recognition via the students app without the need to integrate with any schools internal systems

## OFFLINE CAPABILITY

Run services without the reliance for network connectivity - operate in offline mode to ensure you can continue to trade

## PORTABLE

Solution runs on an Android tablet removing the need for any expensive and bulky hardware

## MANAGEMENT TOOL

Comprehensive Management tools available for all modules to allow the solution to be completely self managed

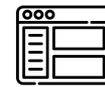

## CLOUD BASED

Back of house system is web responsive allowing operators to use the tool on the go from a tablet or laptop ensuring there's no need for any local installation

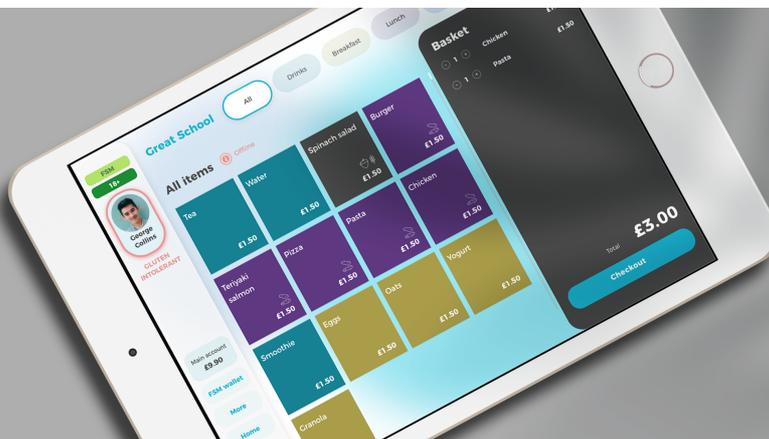

## ANALYTICS

Dashboard reporting - standard KPIs available through dashboard reporting plus a commitment to work with you to deliver any specific contract KPIs

## ADDITIONAL MODULES

Forms, Documents, Data Capture and Messages all support kitchens in their day to day operations and support operators run a centrally managed solution
